

3-13-01

Dear sir,

I can count on one hand how many times I have written to the Government, but I find that this is very important!! Please pass the National organic Food standard. I purchase organic foods whenever available. I see and know people are purchasing more and more organic foods. We as consumers need to know what we are purchasing. That is why these standards are so valuable. Families need to make well-informed decisions.

I would also like to weigh in on the genetically engineered crops issue. The people I talk to do not want this!! But, they agree with me, that if this is going to be used, we need to be informed! People have the right to know. The only way to inform them is by labeling.

I realized this is only one letter - But this is extremely important to me and my family.

I appreciate you taking the time to read my letter.

Thank you,
